APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit to change the point of diversion and place of use of a portion of the waters of an underground source as heretofore granted under Permit 67947 is issued subject to the terms and conditions imposed in said Permit 67947 and with the understanding that no other rights on the source will be affected by the change proposed herein. The well shall be equipped with a 2-inch opening and a totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of the water begins or before the proof of completion of work is filed. If the well is flowing, a valve must be installed and maintained to prevent waste. This source is located within an area designated by the State Engineer pursuant to NRS 534.030. The State retains the right to regulate the use of the water herein granted at any and all times.

This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

The total combined duty of water under Permit 55955, Certificate 14421; Permit 58166, Certificate 14613; and Permit 58168, Certificate 14614 shall not exceed 557.8 acre-feet annually.

The total land irrigated under Permit 55955, Certificate 14421; Permit 58166, Certificate 14613; Permit 58168, Certificate 14614 and Permit 73859 and any water of the Walker River Decree and any storage water appurtenant to the place of use shall not exceed 139.45 acres within the described place of use.

These permits for underground water are issued as a supplemental water supply to lands that have a surface water right from the Walker River as set forth in the Walker River Decree C-125, or from storage water provided from the Walker River Irrigation District. The total diversion of water for irrigation from any and all sources shall not exceed the duty of water for this place of use as set forth in the Decree. Underground water shall not be pumped from the wells described in these permits except to the extent necessary to make up the portion of the entitled duty from Decree and storage water in any given year.

(Continued on Page 3)

The amount of water to be changed shall be limited to the amount which can be applied to beneficial use, and not to exceed 0.041 cubic feet per second, or 9.0 acre-feet per year.

Work must be prosecuted with reasonable diligence and proof of completion of work shall be filed on or before:

November 1, 2007

Water must be placed to beneficial use and proof of the application of water to beneficial use shall be filed on or before:

November 1, 2009

Map in support of proof of beneficial use shall be filed on or before:

November 1, 2009

IN TESTIMONY WHEREOF, I, TRACY TAYLOR, P.E.,

State Engineer of Nevada, have hereunto set

my hand and the seal of my office,

this 1st day of November, A.D. 2006

State Engineer
